

You might have discovered our ✨mysterious✨ past

Including allegations from the whole world of Ro-News (what a bandwagon lmao)

Explanations for the (not really accusations) but claims from RBC

The photo of whoever that is in RBC,
The other side of the screen actually shows a decal saying "Is RBC still good?" which was done in result of all the bans RBC acted on.

The same way RBC would show another companies image on a relevant article, we did just that.

This studio was a free model. (taken down upon request)

If your in the discord, you can actually see the video where this is from!:

The only things our devs used were the microphones, the rbc studio (a free model mind you) was just there lmaoo

Ew?

Hunny those were nonprofits (youth architecture opportunities, yk stuff like that)

Yes, Tagnzz used to be our VP of Dev in our main corp, then an executive in aurora

TEST OF IDENTS AND RATINGS - OBS

i received the info that tagnzz's were copying us again so i did a research

TEST OF IDENTS AND RATINGS - OBS

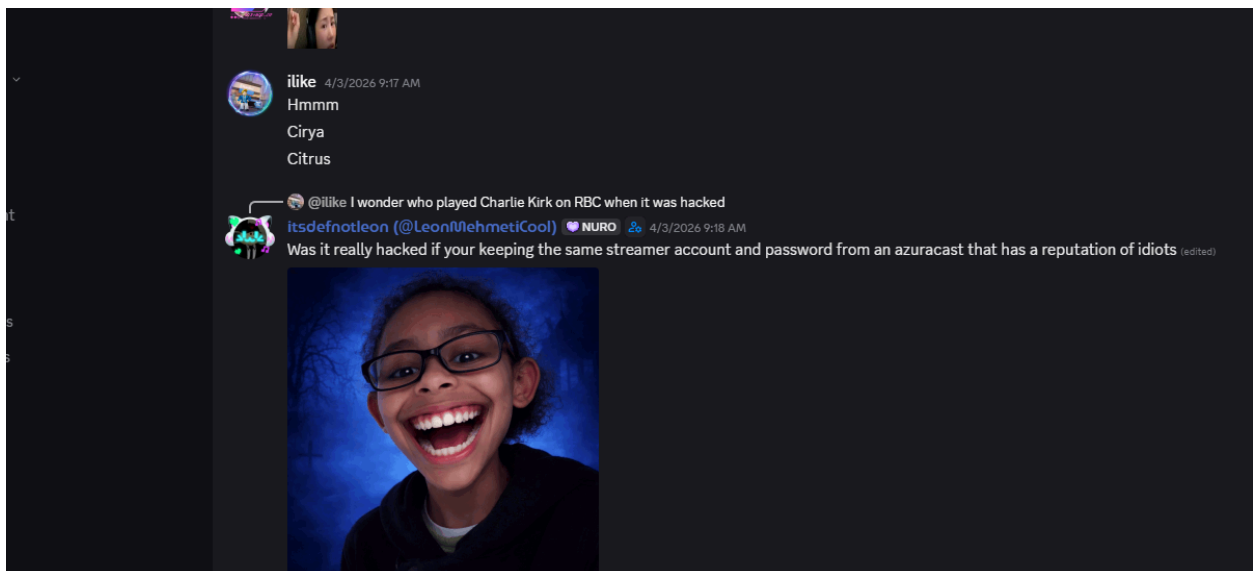

I created the thumbnail, video, everything, plus the video was in collaboration with Astera, (for background we used to own the domain asteragrp.xyz or SOMETHING like that)

Now why would you give leon a azuracast login? No hate leon because he lwk makes good content but like is that not a RBC issue? How is Ciryra Involved.

I actually don't know where this is from, however you can be assured this was removed.

Defending RBU with this one:

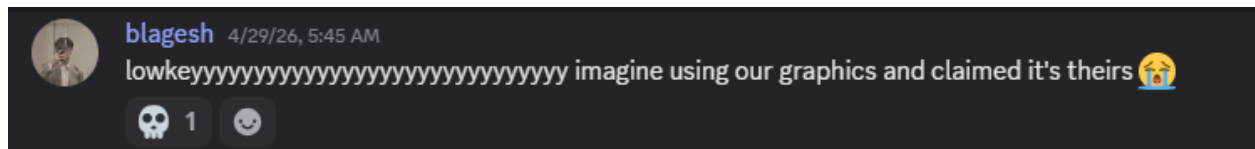

You don't own 3D text, inspiration =X copying (i will say the sign looks fire, good job robin).

There was also other stuff like us stealing this:

This was after the removal request from Astera, (which i think they didn't get the memo on lmao)

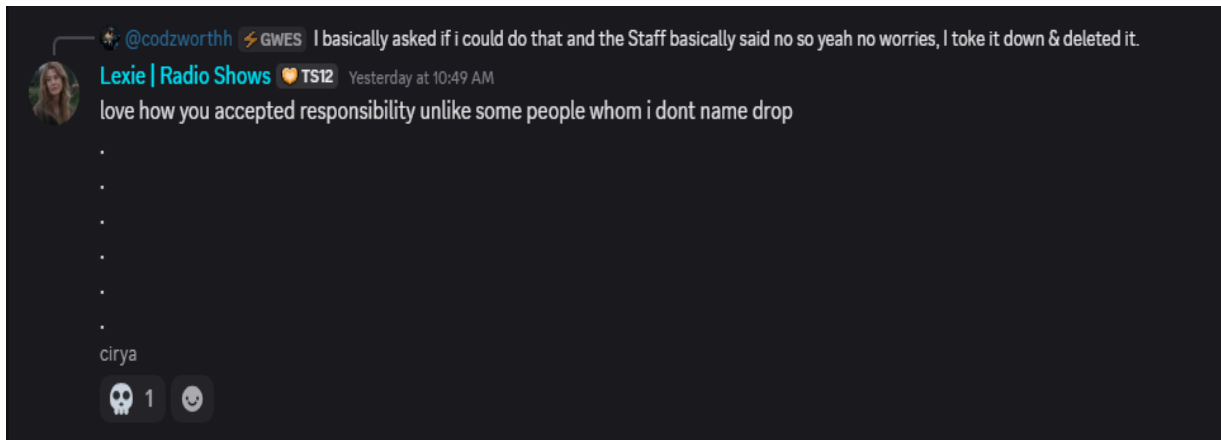

The assets were provided during a collaboration with Astera, the game was still up and used (including camera models *fr my bad Astera*, but they were removed after request)

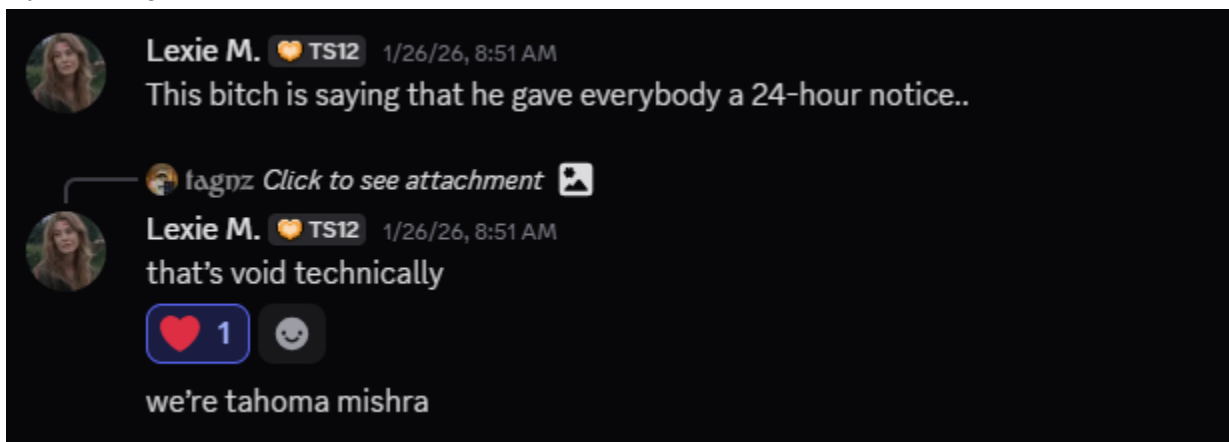

And now to lexie, our favorite!
(she's actually super nice unless your her opp, or cirya lol)

(when we were partners, plus the pervious games had the cameras when we were partners)

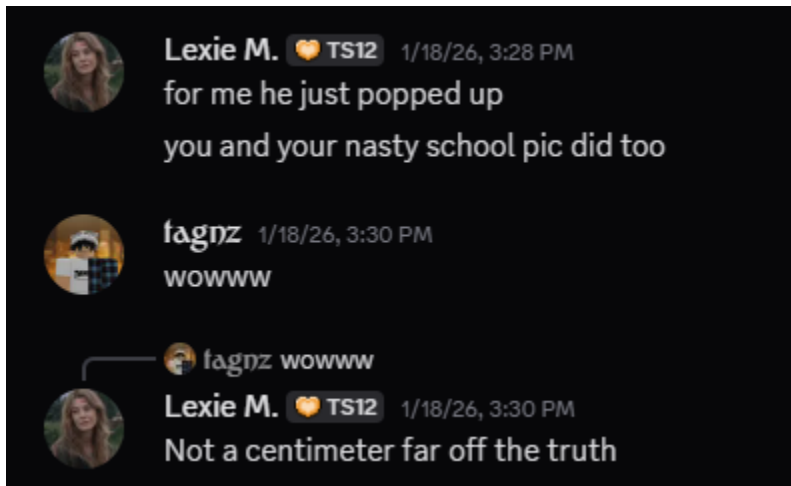

Heres us working on the game together (jayden):

LMAOO funny tho i cant lie

Ok now that was just rude

(my pic was actually horrible she didnt lie lol)

OK back to the important part

We served our time we paid our penance lol and we are focused on create original, and functional experiences not only for us but our community.
